

KYOcontrol Business Edition 1.1

READY-TO-USE SECURITY SOFTWARE

TOP-LEVEL DOCUMENT
SECURITY IN ONE LITTLE BOX.

AN EASY-TO-USE SECURITY SOLUTION WITH SIGNIFICANT ECONOMIC BENEFITS.

These days, confidential information is safe on most modern IT systems – until the moment it is printed out. The time between an employee's click on the print button and their arrival at the printer can easily take three minutes or more – even without an important phone call getting in the way that is more than enough time for simple human curiosity to feed the office grapevine. Whether intentionally or not, prying eyes can open up a major security gap and possibly even breach legal data protection requirements.

DEALING OUT THE RIGHT CARDS

KYOcontrol Business Edition 1.1 works with a user identification system to ensure that documents are delivered only to authorised members of staff. It integrates easily into your Kyocera

KYOcontrol Business Edition 1.1 installed on Kyocera FS-4000DN printer.

print environment and can give a boost to office workflow. Employees simply identify themselves at the printer of their choice with a convenient swipe card – assigned either to individual employees or a specific project – and pick up their printouts whenever they want. In addition, KYOcontrol Business Edition 1.1 offers a comprehensive range of accounting and reporting functions that will help to reduce office operating costs. Security, convenience and economy – an ideal combination for any forward-looking business.

YOUR ADVANTAGES AT A GLANCE:

- ▶ **Document security:** User authentication and data encryption effectively prevent confidential information from falling into the wrong hands.
- ▶ **Financial security:** All hard copy costs are tracked and can be attributed to a specific user, project or department.
- ▶ **Convenient access:** A swipe card provides instant access to any authorised Kyocera device within the system.
- ▶ **Improved workflow:** Documents can be printed any time and at any free or suitably located printer or multifunctional.
- ▶ **Reliable statistics:** User-defined reports give a precise overview of device usage in your company.
- ▶ **Flexible capacity:** Each box contains 1 card reader with 20 ID cards; the system can be expanded to up to 25 Kyocera devices with a maximum of 500 users.

SAFETY FEATURES THAT INCREASE YOUR PRODUCTIVITY

AUTHENTICATION AND ENCRYPTION

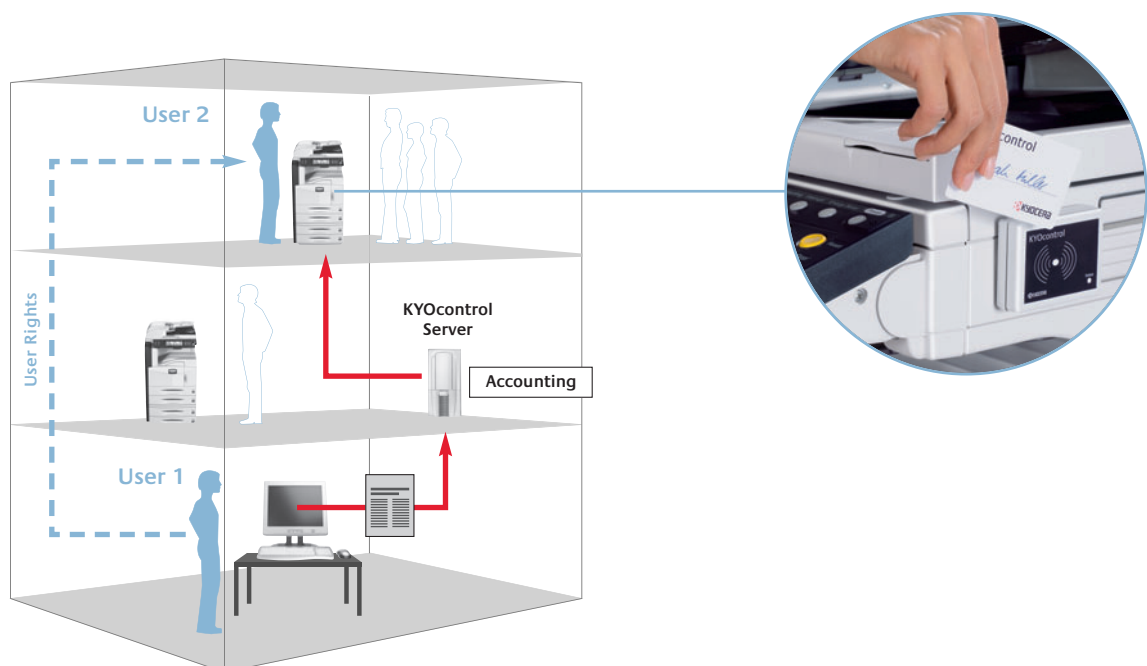

The software automatically encrypts all data stored on the company's central print server. Even if someone manages to break into a company's IT system, they would still be unable to read the documents. When hard copies are needed, the authorised member of staff identifies themselves at the printer or multifunctional by using a convenient swipe card. The device then immediately retrieves the documents from the server and starts printing. The result is on-time printing delivered to authorised people only.

PRINT&FOLLOW™

It's a familiar scenario: documents are sent to the printer, but when the employee arrives at the device, they find it is blocked by a large print job. With the Print&Follow™ function, employees simply go to another printer, identify themselves with their card and pick up the documents. In the case of a meeting elsewhere in the building, the documents can simply be printed out at the nearest suitable device. Yes, secure, on-time printing can be that convenient.

PRINT MAIL

This option is another example of how KYOcontrol intelligently combines top-level security with efficient workflow. Print Mail enables a user to simply forward the authorisation rights for a particular document to another user. In practice: a member of staff sends off a print job and forwards the user rights to a colleague in another department. This person is now able to identify himself at the nearest convenient device to retrieve the document from the print server. This ensures efficient workflow without ever breaching security.

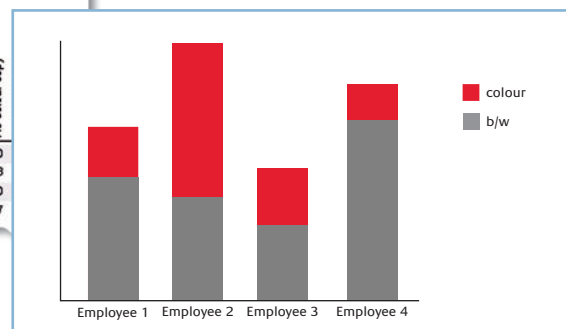

A WHOLE NEW FINANCIAL SECURITY

ACCOUNTING AND REPORTING

KYOcontrol Business Edition 1.1 enables you to identify, manage and control document output so that document costs can be attributed and invoiced to departments, individuals or projects. The software also generates reports that provide page volume information for each device. This information can be segmented by a number of criteria (users, departments, cost centres, etc.) to help you determine the usage of the devices in your company. This information is vital in order to achieve efficient hardware usage and the optimisation of your fleet.

Name (Loginname)		User report							
		A4 b/w print	A4 colour print	A3 b/w print	A3 colour print	A4 b/w copy	A4 colour copy	A3 b/w copy	A3 colour copy
Employee 1		20	37	6	17	0	19	2	0
Employee 2		49	12	0	5	22	12	0	8
Employee 3		60	49	2	19	20	2	6	0
Employee 4		37	81	18	40	12	11	5	7

Colour print costs can be conveniently tracked according to criteria set by your company. This data can then be exported to other programmes for further analysis, e.g. as a bar chart in Excel.

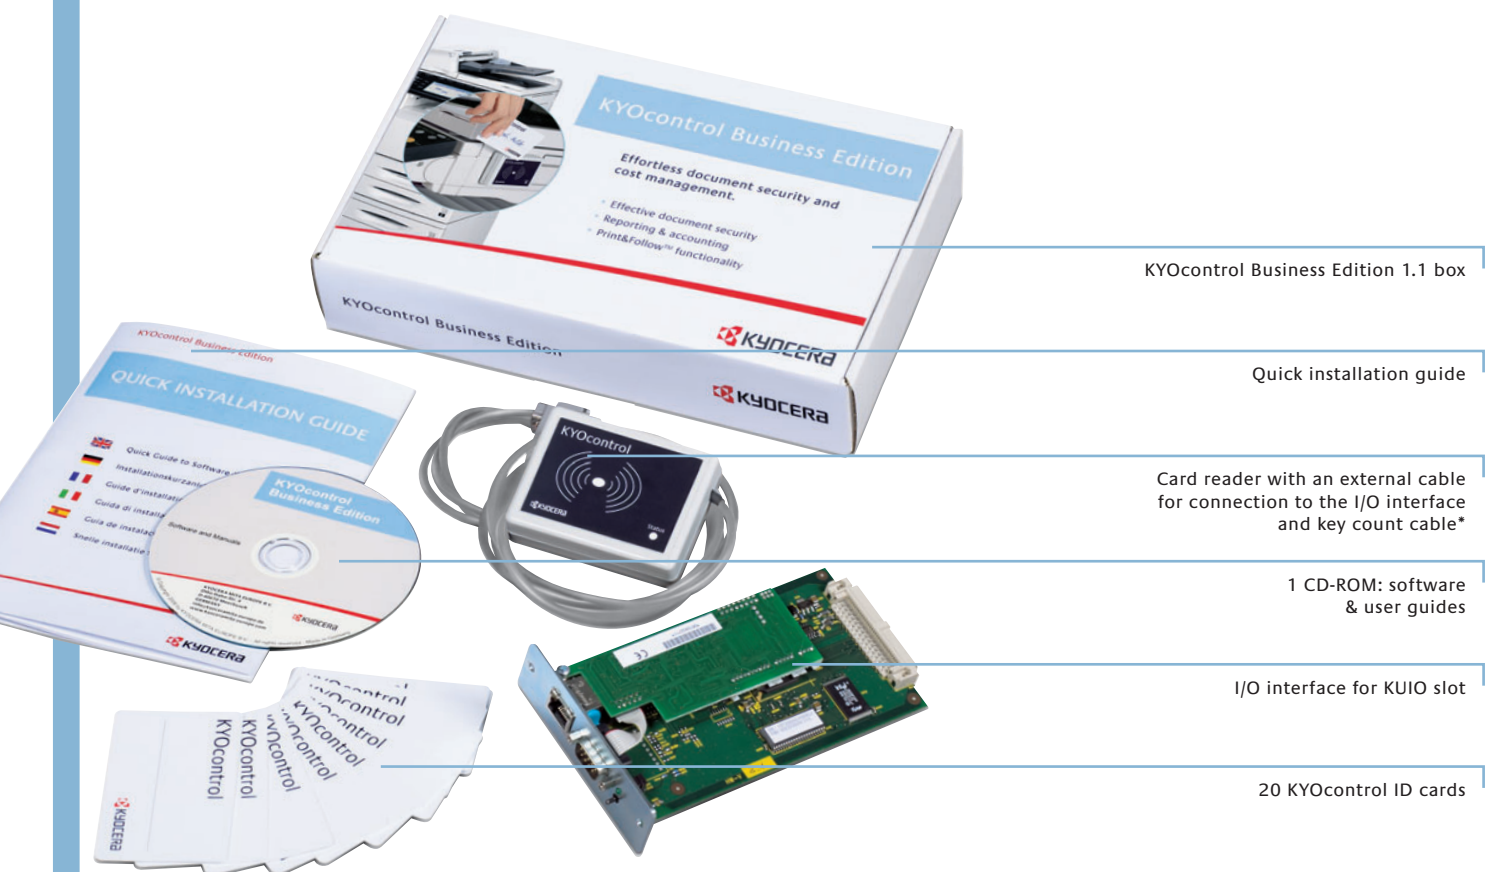

ACCESS MANAGEMENT

Companies can finally profit from the increased effectiveness of colour printing without any dramatic increase in costs because KYOcontrol Business Edition 1.1 allows limiting the use of colour devices both in terms of principle access and volume. Experience shows that effectively setting limits on the use of colour heightens the sense of responsibility with which the devices are used. Let KYOcontrol help you to have complete control over all aspects of office colour usage.

EFFORTLESS INTEGRATION

INTO YOUR EXISTING KYOCERA PRINT ENVIRONMENT.

Naturally, KYOcontrol Business Edition 1.1 integrates easily with Kyocera hardware. All it takes is a simple installation by your authorised Kyocera Business Partner for you to make document security an integral part of your daily routine.

KYOcontrol Business Edition 1.1 box

Quick installation guide

Card reader with an external cable for connection to the I/O interface and key count cable*

1 CD-ROM: software & user guides

I/O interface for KUIO slot

20 KYOcontrol ID cards

As your company grows, KYOcontrol Business Edition 1.1 grows with you – up to a total of 500 users or 25 devices. If you grow even further, learn about KYOcontrol Enterprise, the fully customisable option which covers all your document security needs, both at your headquarters and your branch offices, at home or abroad.

KYOsupport – SOFTWARE ASSISTANCE AT YOUR FINGERTIPS
